ERA OF ECONOMY FOR PANAMANIAN COUNTRY

PANAMA, Oct. 30.—President Porras is determined to inaugurate an era of economy in governmental affairs. His first step in this direction was the discharge of many employees in all the departmental offices and a considerable reduction in the National Police Force. He has also recently reduced the salaries of all employees, including himself, of from 10 to 35 per cent.

In order to better the financial condition of the country through the payment of its current obligations and to liquidate a treasury deficit inherited from a previous administration, an effort is being made to obtain a new loan of \$1,000,000. This is to be secured by a bond issue and will become a part of the national debt which already amounts to \$1,200,000 through a previous bond issue for railway construction purposes.

Both the reduction in force and salaries were ordered by the president in obedience to the advice and wishes of his political advisers who fear that it will have a material influence on the presidential election next year. The president, however, pointed out that the economy was urgently needed to prevent the country from becoming utterly bankrupt. He told them that the national treasury was practically empty and that many municipalities had to be resorted to to obtain sufficient money to pay the salaries due to employees.

The expenses of the government have been considerably in excess of the revenue chiefly because in the past little or no attention was paid to financial economy and reforms, and also to the great falling off in import duties because of the war in Europe and general business depression throughout the republic itself.

Offers of a loan have been made by a local banker and also one in New York. Negotiations are still in progress in hopes of obtaining better terms than 8 per cent interest. The previous loan was placed at 8 1/2 per cent interest. Any loan negotiated will have to have the approval of the American government and this is being sought.

INVESTIGATE FAY CASE

NEW YORK, Oct. 30.—The cases of Robert Fay, confessed German bomb plotter, and four others charged with conspiracy to disable steamers bearing supplies for the allies, probably will go before the Federal grand jury Wednesday. The United States District Attorney said: "Fay's arrest

after he had been watched for weeks, was ordered because it was feared he was on the verge of using bombs he had prepared. Now he is in the custody of the government which will continue the investigation of the ramifications of his plot, if there are any ramifications. There is no evidence to show that Fay acted on other than his own responsibility."

COLLEGE BOY ROBBER

BERKELEY, Oct. 30.—Leon Norman Long, a sophomore at the university of California, confessed that he received money necessary to his extravagant living through robberies. His college mates at Berkeley and store keepers were among his victims. Long is a stepson of the superintendent of the Pacific Electric railway of living at Redondo Beach, California. The police say they have records of robberies committed by Long in his high school days.

FOR CONTINENTAL ARMY.

WASHINGTON, Oct. 30.—The support of the national guardmen for the administration of defense plans including the continental army, was virtually assured at the conclusion of conferences between Garrison and members of the executive committee of the National Guard association and national militia board. Garrison convinced the guardmen of the wisdom of the continental army plan and assured them no steps would be spared to promote the interest of the national guard because of the new plan.

The though the continental guard will not be taking the place of the organized militia, and will play an important part in the defense of the nation. On the neighborhood of six hundred thousand men will be trained in the use of army rifles, to form a nucleus around which a great army of a million and a half will be formed in time of war. No expense will be spared to bring them to the fullest degree of efficiency in the shortest time of intensive training. The national guard will be favorable to the recommendations of the Secretary in regard to the increase of the regular army and proposal of citizen soldiery under certain conditions.

Coke contains all of the ash and about half of the sulphur originally present in the coal from which it was made. All the phosphorus of the coal is present in the coke; there are also present a considerable amount of nitrogen and water, and small amounts of hydrogen and oxygen that cannot be driven off by heat.

TUBERCULOSIS FROM WAR

PARIS, Oct. 30.—Among the many problems with which the government has to deal as a result of the war, is that of tuberculosis. Life at the front has cured or benefited many soldiers predisposed to lung trouble. On the other hand a large number have been unable to withstand the rigors of a long campaign and the white plague has left its mark in the ranks.

For the treatment and care of tubercular soldiers the department of public hygiene has at its disposal a preliminary sum of 2,000,000 francs (\$400,000). As all arrangements for caring for the men have not been completed, the War Department has temporarily undertaken the task and has been granted for each patient an allowance of 3 francs (60 cents) a day for three months. While the sanitary service is studying the best means of dealing with the question, the army is at work weeding out all who show the slightest indication of tuberculosis. Their presence is regarded as dangerous to the health of others and every precaution is taken.

"Before long we hope to have these men isolated, where they will be in the hands of specialists and given the most scientific treatment in sanatoria adapted to the purpose," said Monsieur Jules Brisson, director of the public health service, to the Associated Press. "For the time being they are receiving attention at the various military hospitals."

SWEDISH IMPORTS INCREASE

STOCKHOLM, Oct. 30.—Figures showing the exact increase in Swedish imports and exports since the beginning of the war and upholding the English contention that Sweden has acted as a valuable channel for the delivery of materials to Germany, have been obtained by a correspondent of the Associated Press. According to these statistics, which are as yet unpublished, and now available for the first time, Sweden's cotton imports during the first six months of 1915 were over nine times as large as her cotton imports during the corresponding months of the previous year. From January to June, 1915, Sweden imported 12,557,530 kilos of cotton. During the equivalent period this year the import was risen to 109,925,031 kilos.

Although cotton shows the most startling increase, the importation of other articles has risen considerably. Twenty-three million kilos of coffee have been imported in the first six months of 1915, against sixteen millions for the same part of the previous year. Cocoa beans have increased from 800 thousand to one million six hundred thousand during the same period of time. Lubricating and mineral oils have also shown increase.

While Sweden exported only 836,559 kilos of copper during the six months before the war began, she exported during the next six months 2,852,563 kilos. The figures given do not tell what portion of this export has gone to Germany and what portion elsewhere, but it is generally agreed that it has been sent almost exclusively to Germany. Figures regarding other exports are not now available.

JAPAN FURNISHING RUSSIA MANY SUPPLIES.

TOKIO, Japan, Oct. 30.—The output of war munitions for Russia resulting from the recent agreement between Japan and the Allies is already showing a great increase. Russian orders include railroad cars, a large quantity of rails, sleepers, locomotives, as well as guns, rifles, ammunition, boots, and general leather equipment and cloth.

One consequence of the enlarged demand has been a rise of steel bars on the Tokyo market from \$22.50 per ton to \$27.50, with the upward tendency continuing. Various shoe factories in Tokio and other cities received orders from Russia a few days ago for a million pairs of boots.

A contract has been signed between the representative of a Russian commercial house at Vladivostok and a merchant of Osaka for the supply of munitions of war valued at 17,000,000 yen or \$5,500,000, the order to be completed by April or May next.

It is understood that a portion of the payment for supply by Japan of war munitions will be made by treasury bills of the Russian government. The principal banks of Tokio and Osaka will form a syndicate with the support of the Bank of Japan to facilitate the issue of the bills which it is believed will be accepted without any form of security or guarantee by a third party as was at first thought necessary. The period of redemption is expected to be no shorter than two months and not longer than two years.

Commissioners will be appointed by the Russian government to arrange with the bankers here at each issue respecting the rate of interest and the form of redemption. It is also understood that at least twenty per cent of each payment by Russia will be made in cash, gold specie being forwarded by way of Siberia.

DEATH FOR REVOLT

AGAINST JAPANESE.

TAIWAN, Formosa, Oct. 30.—One hundred and seven Formosans were sentenced to death yesterday for revolt against the Japanese administration. The judge who pronounced the doom of the revolutionaries warned the authorities that the natives were disaffected with the government regulations under which they lived and that the revolutionary movement started by the accused had a far reaching effect among the islanders.

Two of the ringleaders were counsellors of the Taiwan prefectural office. In their statement in reply to the query of the public prosecutor they said that since the occupation of Formosa by Japan the islanders had constantly suffered from misadministration; that they had been deprived of their industries and trade and were growing under heavy taxation. They declared that in the long run the islanders would be reduced to wretched and deplorable conditions. Their aim was to drive out the Japanese from the island.

According to the prosecutor the revolutionaries made efforts to raise funds by inducing the ignorant islanders to join and support their scheme. To carry out this purpose they fabricated and circulated wild rumors to appeal to the superstitious minds of the islanders. They declared among other things that a Buddhist prophet had foretold Japan's occupation would expire next year and that in case the Japanese did not leave the population would be annihilated by divine power. Those who contributed were given a tablet which, when carried on the body in case of warfare was to be effective in protecting from danger of death. Furthermore during the Taishan attack and the Japan-China negotiations, they circulated a rumor that many German aeroplanes and a big force of Chinese revolutionaries would come over to the island to recover the soil from Japan.

NEW FORCES TRAINING

AUCLAND, New Zealand, Oct. 30.—South Sea Islanders are soon to be among the troops being trained in fight for Great Britain. A transport will leave this port this week for Rarotonga in the Cook Group and Niue Island, which lies between the Cook archipelago and Tonga, to take on board native contingents from Rarotonga and Niue Island. The islanders will be brought to New Zealand and will eventually be merged with a force of Maori natives of New Zealand, when the latter are sent to the front.

Some months ago Niue Island attracted general attention because up on the news that Great Britain was at war reaching there the tribes gathered round a sum of money for the British cause, addressed a letter to King George in which they referred to their island as "the smallest child of the great mother land," and offered to provide 200 fighting men. Subsequently the New Zealand Government sent a non-commissioned officer to the island who has been drilling the natives for some months.

RELEASED ON BOND.

LOS ANGELES, Oct. 30.—Police Sergeant William Cahill and Patrolman Samuel Shammo, charged with manslaughter, were granted writs of habeas corpus and released on \$5000 bond each by Judge Willis, in the superior court. The writs were returnable Monday. The action was taken under a decision of the state supreme court exonerating the policemen who killed innocents while in pursuit of suspects. The charges of murder were reduced at the preliminary earlier in the day.

Churches

PRESBYTERIAN CHURCH

Sunday School at 9:45 a. m. All adult members are urged to be present Sunday.

Christian Endeavor at 6:30 p. m. Topic: "Increase and Efficiency—Two Permanent Christian Endeavor Ideals."—Ephesians 4:1-16.

ORPHEUM CHANGES.

Tonight will be the farewell performance of Armstrong's Baby Dolls at the Orpheum. A strong feature bill will be shown and some time will be had for Halloween night. A surprise is promised the Orpheum patrons and the farewell to the Baby Dolls will not have a dull minute from start to finish.

On Monday the Orpheum will open with a strong feature program starting with the World Film Corporation's greatest dramatic sensation "Lola." On account of the Orpheum not running an untimed this master feature will be shown at the Royal from one to six in the afternoon. The World Corporation have featured their most famous star Clara Kimbell Young in the title role and it promises to be the strongest drama with a punch ever brought to the Orpheum. On Thursday Wilton Lackay will be seen in his masterpiece "The Pit" taken from his famous stage success. On the following Sunday Theda Bara will be seen in the leader of them all "The Devil's Daughter."

Opposite Johnson Hotel

Firestone Faith

The Firestone ideas of motor-ing are founded on a belief in the wisdom and common sense of the motorist—and this faith has been justified. Firestone success has proven that the car owner wants safety, comfort and Most Miles per Dollar. He wants the quality that costs less to use.

The Non-Skid lettering is an imprint of safety. You need it always—but particularly at this time of year. It holds the standard for endurance and economy. The letters prevent spin or skid in any direction, they radiate the heat of road friction, insure perfect traction with gasoline economy, car-protection and maximum comfort. Everywhere experienced motorists praise Firestone performance.
